K.K. Wagh College, Nasik

MBA (IT)

2011 - 2013

Professional Summary

I'm a passionate and detail-oriented QA engineer with 5+ years of testing experience in the technology field. I thrive in Agile environments and have a strong background in regression, functional, and exploratory testing. I'm dedicated to delivering high-quality products and am proficient in using testing tools like Postman, JIRA, Confluence and Charles/Fiddler. While I have some experience with JavaScript, I'm always eager to learn and adapt to new challenges.

Experience

QA Tester

Total System Services | Pune, India | Dec 2019 - Feb 2023

- Conducted testing of REST API-based backend system called Spectrum
- Performed API automation using Postman and JavaScript, utilizing the Newman command line collection runner
- Hands on experience of testing API based front end and backend application developed on microservice Architecture.
- Using debugging tools like Charles and Wireshark to analyze API flows
- Collaborated with cross-functional teams of solution Architect, Developers, Integration teams, Scrum Masters to ensure the quality and reliability of the deliverables.
- Expertly utilized defect tracking tools such as Jira and Confluence to identify, document, and manage issues
- Translated functional and non-functional requirements into comprehensive test cases
- Set up test data and executed test cases to validate system functionality and performance
- Managed bug reporting and tracking processes, facilitating effective resolution and closure.
